Age : 32
Marital Status : Married
Languages : Persian, English
Education : Self Taught Developer since 2005

Github : https://github.com/knavels

Gist : https://gist.github.com/knavels

Looking to work with international teams, grow my insight on building

applications and designing software, especially in the SaaS space.

In my spare time, I put my efforts on various projects and ideas which are

mainly about building tools for developers.

Self Employed - Programming Languages
Platform (ANTLR, PYTHON, JAVA, KOTLIN)
March 2018 - PRESENT

I always dreamed to create languages and I started studying language design, principles and tools 5 years ago, since march 2018, I started doing the real things and I'm now working actively on my own language

Self Employed - Full Stack Developer/ Stock Market Signaler
Platform (React, Django,, Graphql, Postgres)
November 2019- April 2020

I signed a contract with 4 high level members of the Industrial Engineering Faculty of Amirkabir University of Tehran to build a complete platform for any active/interested person in stock market to be able to publish/buy buying/selling stocks, we also have been working on so many stock prediction algorithms. Currently all application sections are done by me as a Full Stack Developer (React, Django, Graphql, Postgres)

Self Employed /Freelancer (React, Django, Flutter, Kiwi)
June 2019- PRESENT

I decided to quit my full time job and make new experience in my work life, also improve my abilities and skills. I also worked on my own projects and could manage to plan 2 different projects for myself which both are planned to be startups.

Kavano Software Co. / Senior Developer - React, Laravel, Node.js
Team Leader
2017- 2019

I found a new company named "Rayatak" with 3 developer working on laravel 4, I joined them and start building teams and doing projects such as "Complete School Management System", "Catering Management System", "New Approach Looking Office Automation" , "Localized asterisk telephony system"

I also attracted more than 15 developers to the company and built 4 teams all working on my direct management on different projects.

Then we changed the name of the company to Kavano co.
